1 What is a clause?

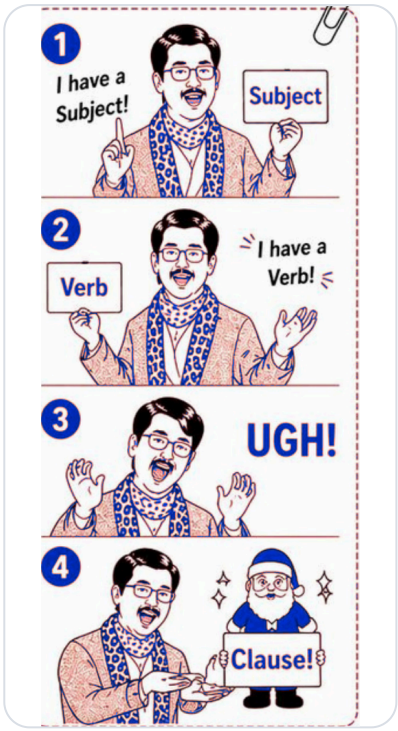

EXPLANATION A clause is a part of a sentence that traditionally consists of a **subject** and a **predicate**.

FORMULA **CLAUSE = S + V**

EXAMPLES

1. SATUstoz is goofy! 🤓
   → Subject "SATUstoz," Predicate "is goofy"
2. If only I could talk with that administrator longer 😮‍💨
   → Subject "I," Predicate "could talk"
3. Why teachers write on TVs is the same reason why dogs pee on trees—to leave a mark. 😳
   → Subject "Why teachers write on TVs," Predicate "is…"

P.S. Can you find other clauses here? 😈

2 Dependent vs Independent

EXPLANATION An **independent clause** can stand on its own. A **dependent clause** is meaningless by itself and thus can't stand on its own.

- If the **dependent** clause comes first and is followed by the independent clause, we **put a comma**.
- If the **independent** clause comes first and ends with a dependent clause, we **don't put a comma**.

FORMULA **Dep Clause, Indep Clause** | **Indep Clause Dep Clause**

EXAMPLES

1. If I had a salary like those IT guys, I would definitely fix all platform issues. 🙂
   → Dep clause "If I had…," Indep clause "I would… fix"
2. I would definitely fix all platform issues if I had a salary like those IT guys. 🙂
   → Same as example 1, no comma
3. Ditching the exam on Sunday, I headed towards the mountains because I'm simply not like others. 🏔️
   → Indep clause "I headed towards the mountains." What's left? Dependent!

DEP , IND ✓

IND DEP ✓

IND , DEP ✗

Swap and write every possible version of Sentence 3 😈

1. _____
2. _____
3. _____
4. _____

3 There are 4 types of sentences

1 Simple sentence

Explanation: A simple sentence is 1 independent clause.

FORMULA **INDEP**

Example: Mr. Information likes spreading out misinformation.

2 Complex sentence

Explanation: A complex sentence is a dependent clause + an independent clause.

FORMULA **DEP + INDEP**

Example: Mr. Information likes spreading out misinformation because he is nuts!

3 Compound sentence

Explanation: A compound sentence is an independent clause + an independent clause.

FORMULA **INDEP + INDEP**

Example: Mr. Information likes to spread out misinformation, and he films it.

4 Complex-compound sentence

Explanation: A complex-compound sentence is an independent clause + an independent clause + a dependent clause.

FORMULA **INDEP + INDEP + DEP**

Example: Because he is nuts, Mr. Information likes to spread out misinformation, and he films it.

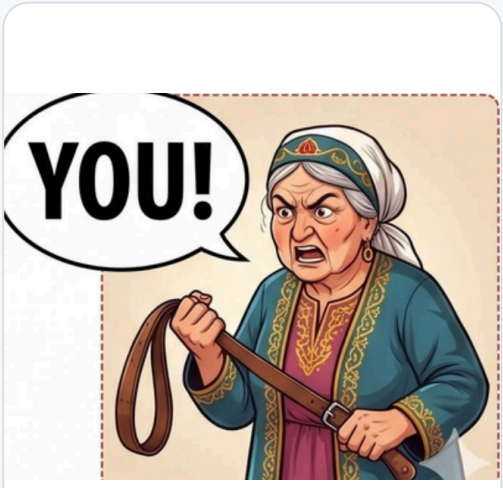

4 Imperatives

An imperative is a sentence that gives a command, instruction, request, or advice. There is an implied subject "**You**" in imperatives.

FORMULA **[YOU] + VERB**

1. **Shut up, please!** → [YOU] Shut up, please!
2. **Just let it happen!** → [YOU] Just let it happen!
3. **Stay with me!** → [YOU] Stay with me!

5 5 ways to connect 2 independent clauses

1 Period (.)

Ind Clause. Ind Clause

She is insane. She will get 1600.

2 Semicolon (;)

Ind Clause; Ind Clause

She is insane; she will get 1600.

3 Comma + FANBOYS

Ind Clause, FANBOYS Ind Clause

for, and, nor, but, or, yet, so

She is insane, **so** she will get 1600.

She isn't insane, **nor** will she get 1600.

for = because: She will get 1600, **for** she is insane.

4 Colon (:)

Ind Clause: Ind Clause (explanation)

She will get 1600: she is insane.

★ The second independent clause clarifies the first. It answers "how?" or "why?"

5 Dash (—)

Ind Clause — Ind Clause (emphasis, surprise, explanation)

She will get 1600—she must be insane!

★ Interchangeable with a colon here.

× **Comma splice:**
"She is insane, she will get 1600."

✓ **Semicolon:**
"She is insane; she will get 1600."

6 Participles

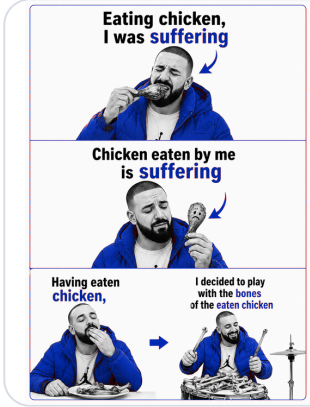

A verb form used as an adjective.

FORMULA

- **V-ing** (active): the action is DONE by the noun itself
- **V3 / -ed** (passive): the action is RECEIVED by the noun; someone else did it to the noun
- **Having + V3**: the action was done before the other action

EXAMPLES

- **Eating** chicken, I was suffering.
- Chicken **eaten** by me was suffering.
- **Having eaten** chicken, I decided to torture the bones of the eaten chicken.

Non-essential → commas
Essential → no commas
At the beginning → always a comma

- Ahror Alimjon, sitting by the entrance, is the founder.
- A guy sitting by the entrance is the founder.
- Sitting by the entrance, the guy is the founder.

Refers to the last noun → no comma

I watched dancing babies singing a song.
→ the babies are singing

Refers to the whole idea before → comma

I watched dancing babies, singing a song.
→ I watched while singing myself

7 Relative clause

Describes a noun using a relative pronoun.

FORMULA **Relative pronoun (who / which / that…) + verb**

- A person **who thinks all the time** has nothing to think about except thought.
  → r.c.: "who thinks all the time"
- The mentor **whose eyes are beautiful** is talking to me.
  → r.c.: "whose eyes are beautiful"

Tell me who you're related to, and I will tell you who you are

Non-essential → commas
Ahror Alimjon, who is the founder of SATUstoz, has a beautiful surname.

Essential → no commas
The guy at the entrance who is the founder of SATUstoz has a beautiful surname.

BUT: a clause with **"that" → always essential**
Ahror **that** is the founder of SATUstoz has a beautiful surname.

NOTE: You still might see a comma near "that" → the comma might belong **not** to "that"!

- Ahror **that, surprisingly,** is the founder of SATUstoz has a beautiful surname.
- The guy at the entrance, or Ahror Alimjon, **that** is the founder of SATUstoz has a beautiful surname.

😈 **P.S.** All surnames are equally beautiful, but some are more equal than others.

8 Noun clause

Definition: A clause (S + V) that acts like a noun.

FORMULA **Noun Clause = Wh-word / that + S + V**

1. **Where I have been** is none of your business.
2. I know **that she is right**.
3. The only reason **why I work** here is money.
